

Retailer Installed Accessory Catalog

Don't Just Accessorize . . . Saturn-ize!

At Saturn, designing and building cars that meet your needs is our first order of business. Our cars are an expression of our philosophy as a company. But we also know that a car is an expression of your individuality. So we've provided a way to add a signature touch to your Saturn with unique Retailer Installed Accessories.

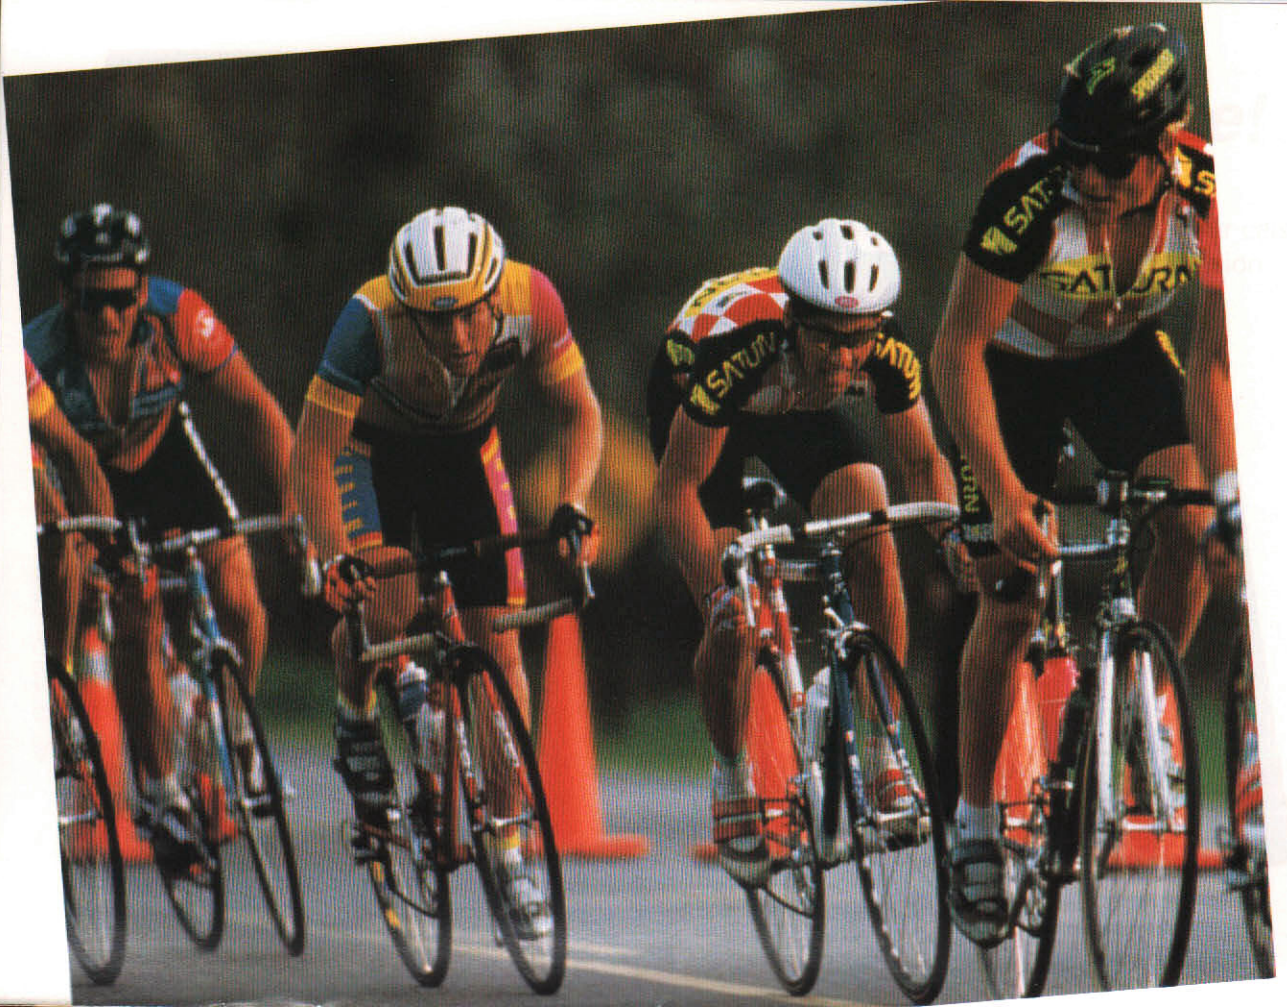

After you choose the Saturn sedan, coupe or wagon that meets your distinctive needs, personalize it with accessories to suit your lifestyle — a roof rack, perhaps, or a compact disc player. Whatever you choose, we'll make installation easy — all our accessories are available from and can be installed by your Retailer.

"Finishing" Touch

A run-in with a hurtling rock can mar even the toughest of finishes — such as the one on your Saturn. Our touch-up paint comes in handy for those occasional dings and nicks. The convenient applicator helps make any of the Saturn touch-up colors easy to apply.

Carry It Off

Taking extra gear with you is easy; just load it up with a Saturn roof rack and accessories. One-hundred-pound cargo-carrying capacity ensures that you can take your gear along — bikes, luggage or even a surfboard. Aerodynamically contoured, this non-corrosive rack features a theft-resistant bolt. Three styles: sedan, coupe and wagon.

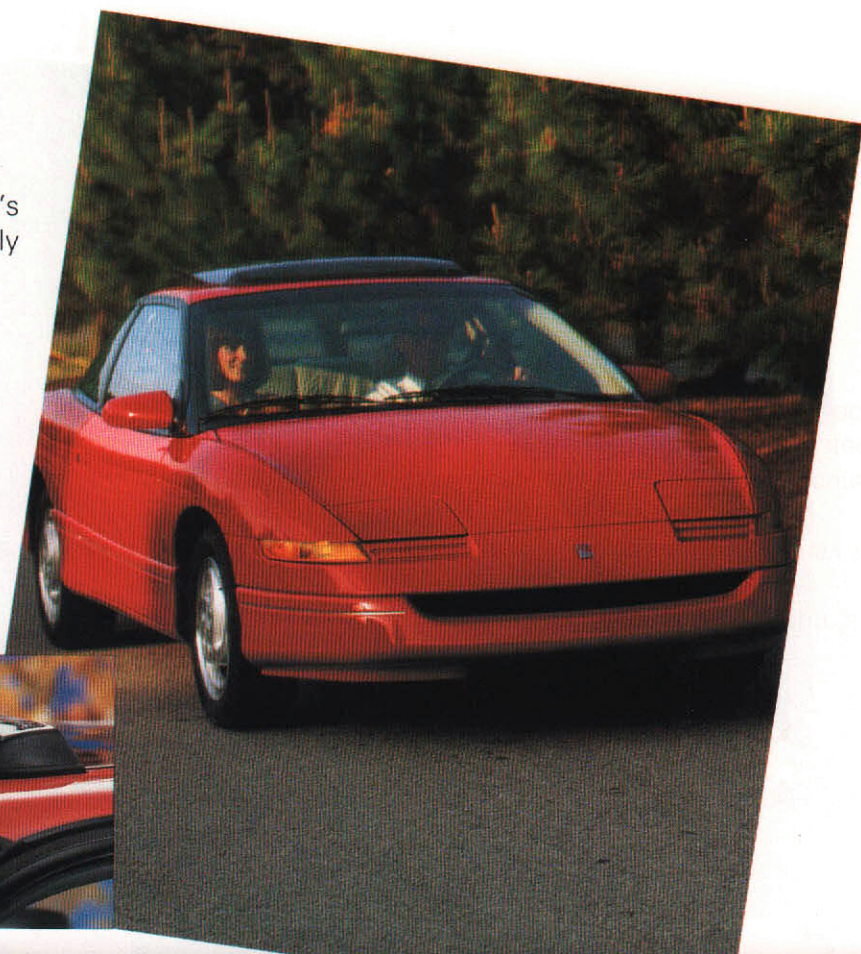

Under Cover

Your Saturn's finish was designed to stand up to the elements, but if you're looking for a little extra protection, this moisture-resistant car cover will provide it. Made from Evolution® 3 material, the cover features a four-layer construction that allows the car underneath to "breathe." Optional lock with cable also available. Two styles: sedan and coupe.

A Breeze

To enhance the open-air feel your sunroof provides, Saturn's wind deflector mounts securely to the roof's surface to help reduce wind noise and buffeting. Installation is a breeze with a spring-loaded mounting bracket and rubber gasket — all without drilling holes. It's easily removed and stands up to mechanical car washes.

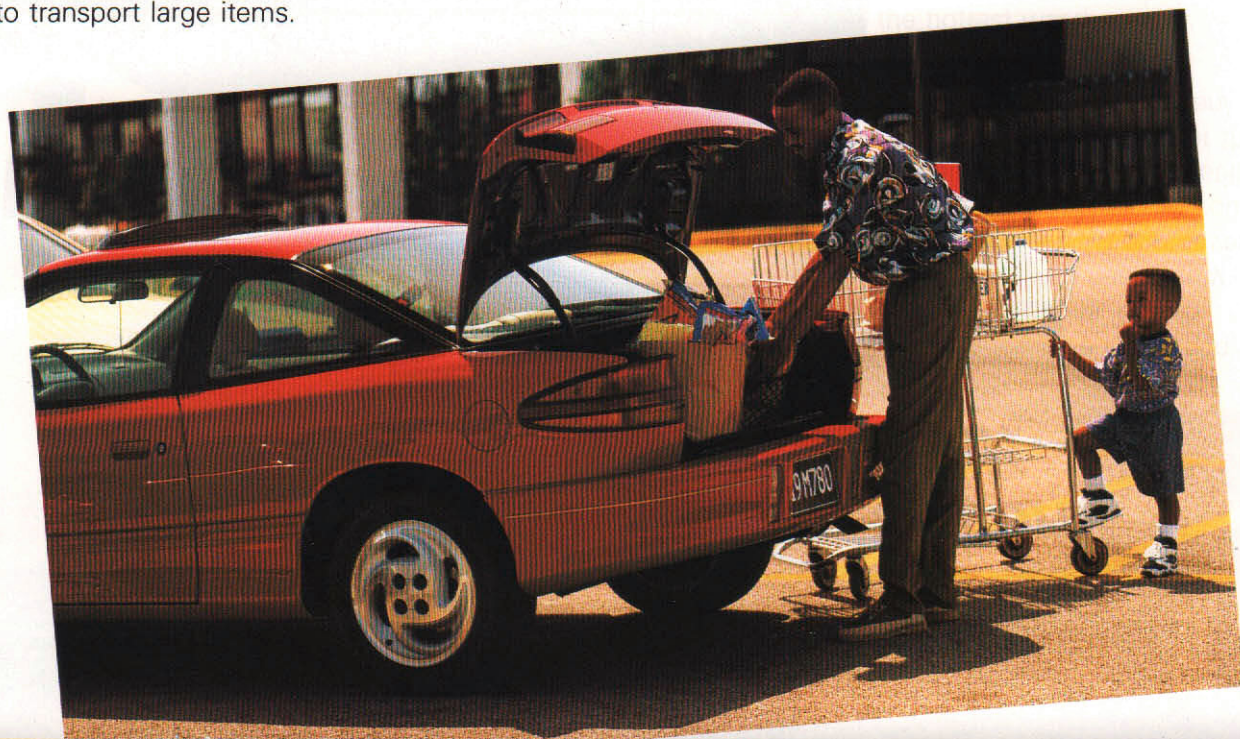

Step On It

You can step all over Saturn's plush carpeted floor mats — these durable mats are easy to clean and feature rubber backing to keep them secure under foot. Color-coordinated and custom-fit to match each Saturn.

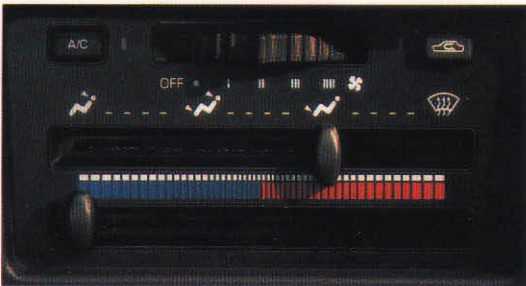

Keep It Together

Saturn's trunk convenience net helps keep your groceries and cargo in one spot. For rugged wear without scratching or damaging your gear, this highly elastic net is covered with Lycra®. It's also multipositional — you can stow items away behind the wheel wells or remove the net altogether to transport large items.

Second Skin

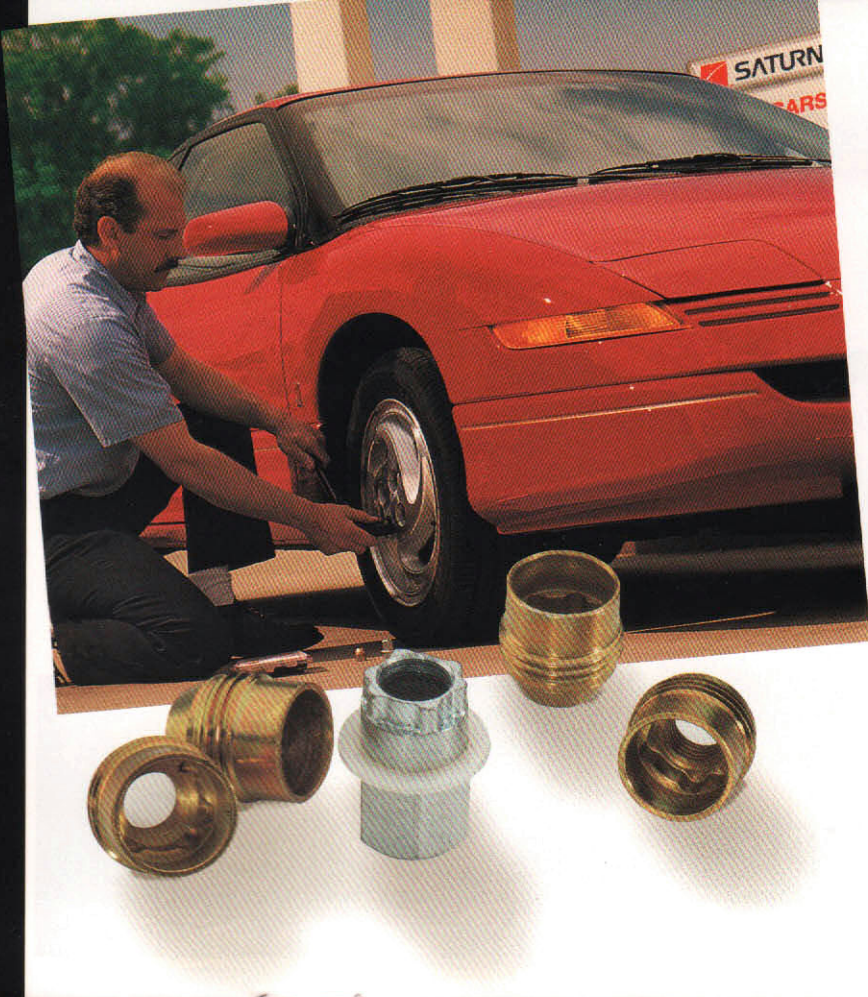

To help improve protection from road debris, Saturn offers a stylish heavy-duty vinyl/flannel front-end cover. It fits like a glove over your Saturn's front end and still allows you to get under the hood. Two styles: sedan/wagon and coupe.

Cool It

Air conditioning with a choice of settings will keep your interior cool, even in the hottest weather.

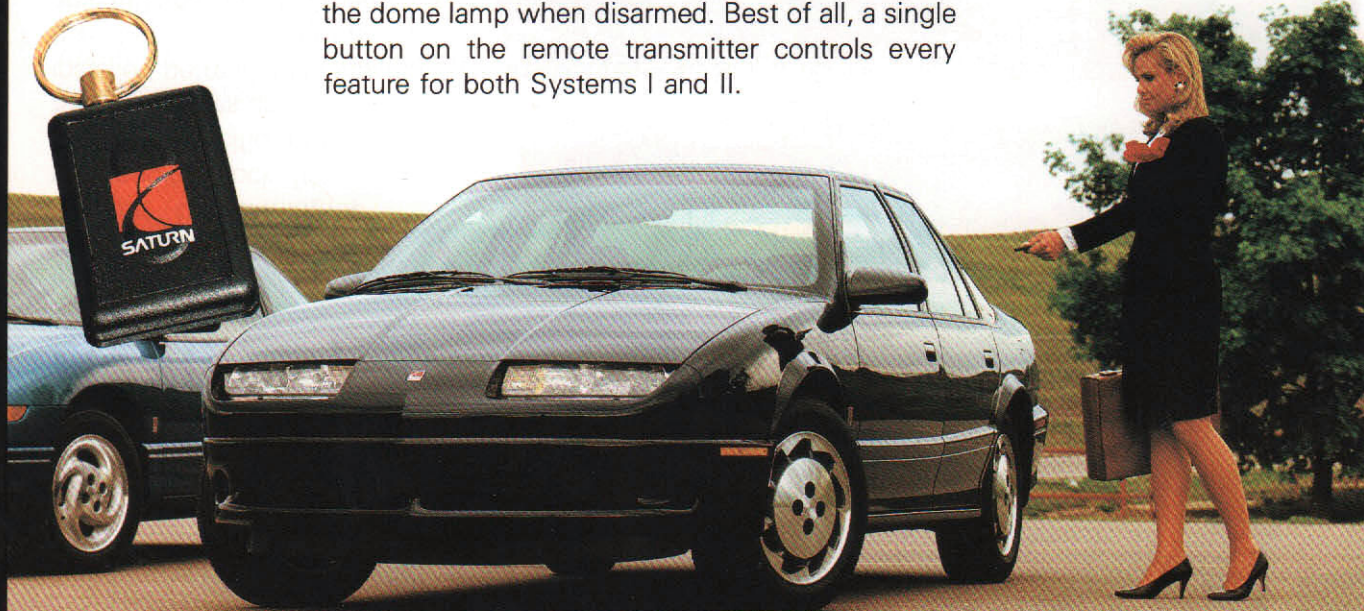

Locked Up

Easily installed wheel locks designed especially for your Saturn will help protect your wheels and tires from theft. Each set is precision weight matched to maintain wheel balance and accepts original-equipment lug nut caps.

Safe, Sound and Simple

With their automatic arming process, Saturn's security systems won't make a sound until you're out of the car — 30 seconds after you've closed the last door. In addition to sounding the alarm, System I is designed to automatically cut off fuel in order to disable the vehicle when the alarm is triggered. For easy handling in a variety of situations, the system features a valet mode and a shock detector, which can be programmed to allow a number of "warn-aways" before the alarm is tripped. System II (uplevel) adds the convenience of remote keyless entry and door-locking, and it turns on the dome lamp when disarmed. Best of all, a single button on the remote transmitter controls every feature for both Systems I and II.

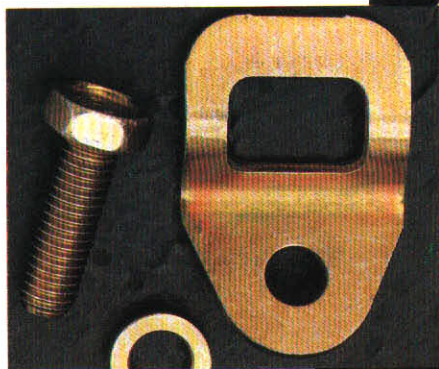

Heat It Up

In blistery-cold temperatures, this heater will help get you "started" by warming up your engine block. It's designed specifically for Saturn engines and is installed permanently. For use, just put the plug in any 110-volt outlet. When not in use, you can protect the plug with the attached plug cover.

Safeguard

At your request, your Saturn Retailer will supply and install one complimentary child seat tether anchor kit to be used in conjunction with your infant or toddler seat. Additional kits can be purchased from your Retailer.

Hands-on Control

Imagine selecting your cruising speed without taking either of your hands from the wheel — Saturn's cruise control is at your fingertips. With a touch of a button, you can maintain a constant speed, coast down to a lower one, or gradually accelerate to a higher one.

Stylize

Aerodynamically styled full wheel covers add extra flair to your Saturn's exterior. They are molded of engineered plastic and covered with an advanced clearcoat finish for long life.

Hold It

Our center armrest with comfortable padded lid and storage for seven cassettes has the advantage of a flip-out cupholder that will hold your beverages. The armrest is color-keyed to match your Saturn and mounts securely on the floor console.

Complete Clean-up

This conveniently packaged set of car care products will help you keep your Saturn looking its best. Includes: Car Wash Concentrate for gentle cleaning; extra-strength Glass Cleaner for streakless glass inside and out; Tar and Road Oil Remover for removing tough grime; Armor All® for vinyl, rubber and leather finishes; Vehicle Polish for one-step-application waxing.

Play On

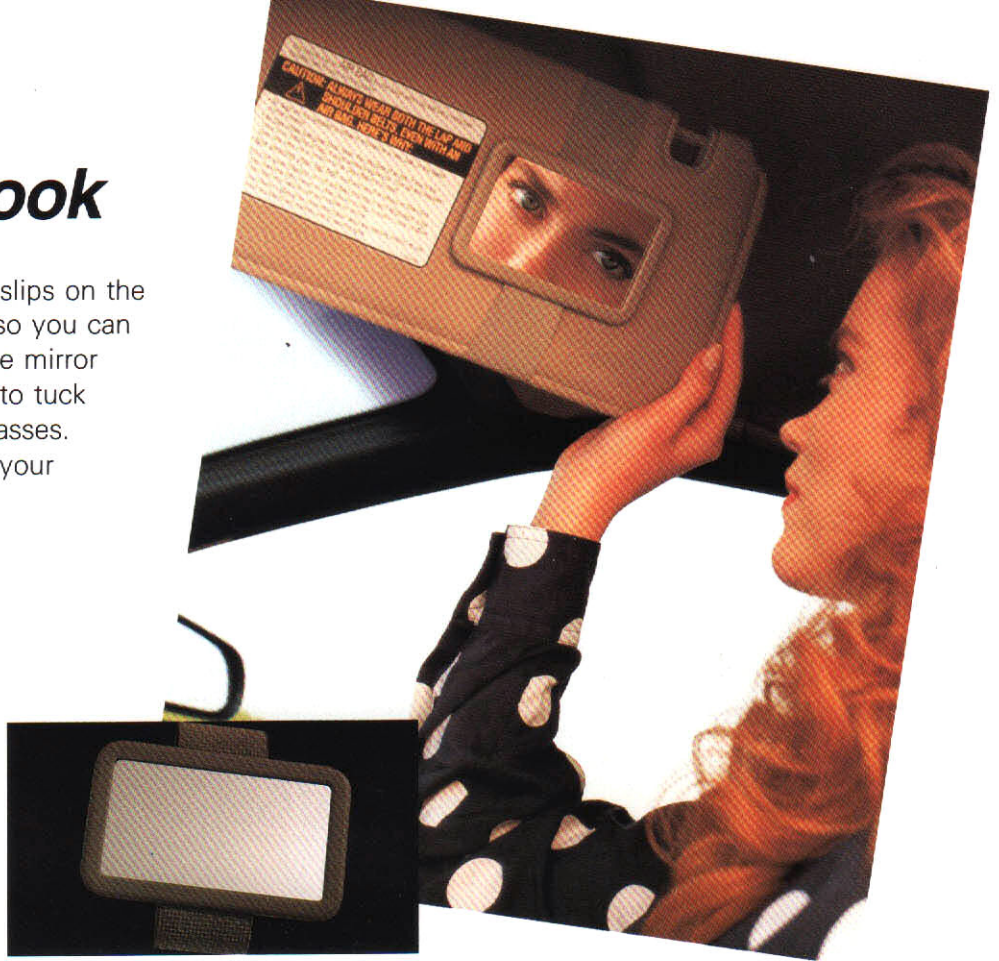

For your listening pleasure, Saturn offers three audio system upgrades featuring state-of-the-art technology:

- 1) AM/FM stereo cassette with 14 station presets, auto reverse, Dolby® noise reduction, seek/scan, bass/treble, and digital clock;
- 2) AM/FM stereo cassette with five-band graphic equalizer and music search plus all of the features listed above;
- 3) AM/FM stereo with compact disc player, five-band graphic equalizer, 12 station presets, audio search, pause, loudness control, and more.

Take A Look

Saturn's vanity mirror slips on the driver's side sunvisor so you can get a "good look." The mirror map strap allows you to tuck away maps and sunglasses. Color-keyed to match your Saturn's headliner.

Watch Out

Whether you're parallel parking, passing on the left, or just looking out for objects in your blind spot, Saturn's right side mirror will help you keep an eye on the passenger's side. It features a black finish, aerodynamic styling, and mirror glass that can be adjusted with little effort.
